

Create a Template in Kid Pix 4

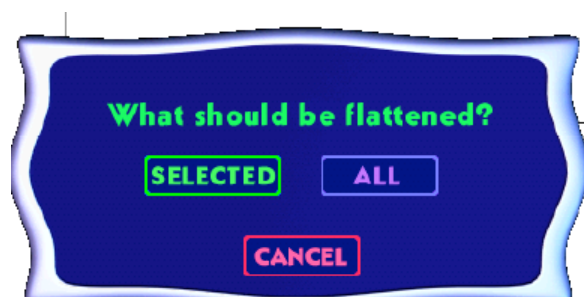

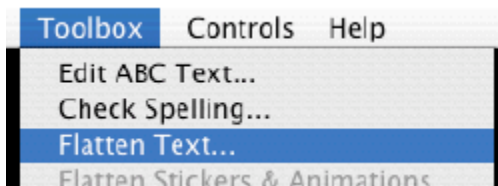

1. Open up the **Teacher's menu** by pressing the **Control** button and **T**. You can add a Note to your template to give directions to your students.

2. Use a text box to type in what you want on your template.

3. Go to **Toolbox**. Scroll down to **Flatten Text**. This text will now stay in place and can only be erased with the eraser tool.

4. Save your template when finished. Click on the icon once and go to **File - Get Info**. Check the box **Stationery Pad**.
